To whom it may concern:

Let it be known, I fully support all good content of XM Satellite Radio. I use the service and recommend it to other people. I especially find useful local traffic and weather. I would find it against the public good to limit the ability of consumers to have the option of purchasing this information. I reject any petition including NAB's 04-160 that may limit my ability to use this type of information. I urge you to please let XM Radio continue to offer this type of programming well into the future.

Thank you.
